SSPY returned 3.76% in Q2 2023 versus the S&P 500 Index that returned 8.74%. SSPY's Stratified Weight seeks to diversify across sectors and sub-sectors to prevent one sector, industry, or company from becoming overconcentrated in the portfolio. The S&P 500 Index, in contrast, had over 45% of its weight in the Info Tools and Information sectors. The performance of these sectors drove the outperformance of the S&P 500 Index for Q2. Additionally, five of these stocks: Apple, Microsoft, Amazon, Nvidia, and Alphabet were overweight by approximately 19% in the S&P 500 Index and helped drive the performance differential versus SSPY for Q2 2023.

The performance quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than the original cost. Shares are bought and sold at market price (not NAV) and are not individually redeemed from the fund. Market price returns are based upon the midpoint of the bid/ask spread at 4:00 p.m. ET (when NAV is normally determined for most funds) and do not represent the returns you would receive if you traded shares at other times. Brokerage commissions will reduce returns. Current performance may be lower or higher than the performance quoted. Performance data current to the most recent month-end may be obtained by calling (866) 972-4492 or visiting www.syntaxadvisors.com.

Performance quoted represents past performance and does not guarantee future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than that shown here. The Adviser has contractually agreed to waive and/or reimburse certain fees/expenses until May 1, 2024. Performance would have been lower without fee waivers/expense reimbursements in effect. The gross expense ratio is 0.45% and the net expense ratio is 0.30%. Index Performance is total return, gross of dividends, not including fees. It is not possible to invest in an Index. Fund performance is net of all fees. Periods greater than one year have been annualized. A privately offered fund "the private fund" managed by Syntax Advisors, LLC was reorganized into the Syntax Stratified LargeCap ETF "the Fund" on January 2, 2019. Prior to the commencement of Fund operations, the performance is that of the private fund. The returns were calculated using the methodology the SEC requires of registered funds. However, since the private fund did not calculate its returns on a per share basis, its returns have been calculated on its total net asset value. While the performance of the private fund is net of all fees and expenses, it has not been restated to reflect the management and fee waivers applicable to the Fund. The Fund may be subject to higher fees which would negatively impact performance. The private fund began operations on January 1, 2015 and, on January 2, 2019, was reorganized into the Fund. Prior to the reorganization, the private fund had investment objectives, policies and strategies that were, in all material respects, the same as those of the Fund, and was managed in a manner that, in all material respects, complied with the investment guidelines and restrictions of the Fund. However, as a registered investment company, the Fund is subject to certain restrictions under the Investment Company Act of 1940 (the "1940 Act") and the Internal Revenue Code of 1986 (the "Internal Revenue Code") which did not apply to the private fund. If the private fund had been subject to the provisions of the 1940 Act and the Internal Revenue Code, its performance could have been adversely affected. However, these restrictions are not expected to have a material effect on the Fund's investment performance.

The Fund is subject to certain other risks, including but not limited to, equity securities risk, large-capitalization risk, index tracking risk, passive strategy/index risk, and market trading risk. Investing involves risk, including possible loss of principal. Shares are bought and sold at market price (not NAV) and are not individually redeemed from the ETF. Investors may purchase or sell individual shares on an exchange on which they are listed. Please see the prospectus for more details.
